

# Ling 170D Introduction to Linguistics

Dr. Nick Danis, [nsdanis@wustl.edu](mailto:nsdanis@wustl.edu)

## Description

This course introduces students to the scientific study of language. All major subfields are covered: the physical description of speech sounds (phonetics), the cognitive patterning of these sounds in a speaker's grammar (phonology), the creation and analysis of word and phrase structure (morphology and syntax), and the study of compositional meaning of these sentences (semantics) and their interaction in a discourse (pragmatics). Students will learn the fundamental tools and analytical methodology in each. Additionally, this course covers special topics in language variation, acquisition, and change; and writing systems.

## Goals

1. Learn to view natural language, and humanity's capacity for it, as an object of scientific inquiry
2. Understand the different core subfields within linguistics: phonetics, phonology, morphology, syntax, and semantics
3. Create representations and implement methodology within these subfields
4. Analyze and solve problems in novel natural language data
5. Apply linguistic tools to critique and debunk common myths about language

## Required Materials

The required textbook is the 12th edition of Language Files (abbreviated LF12). Earlier editions are likely to differ in content and organization. Any additional readings are posted as PDFs as necessary.

## Attendance and delivery

In-person attendance is required for the course. However, be smart and put your health, and the health of others, first. If you are sick, or think you are getting sick, please take all necessary precautions (health services, etc) and also contact me as soon as you think you might miss class. You will not be penalized for excused absences. If you contact me before you miss class, I will likely be able to record the class in some way. Lectures will not be recorded by default, so it is important for you to contact me.

## Grade

The grade breakdown is shown below.

Category	Weight
Quizzes	50%
Exercises	40%
Participation	10%

### *Quizzes*

There are four quizzes throughout the duration of this class. These are administered on Canvas, graded, open-book, and with a time limit. You have only one submission. Treat these as mini-midterm exams that are taking the place of in-person exams. These are the bulk of your grade.

### *Exercises*

There will be several exercises throughout the semester, intended to give you a more hands-on experience with the material. Some will be individual assignments, some will be group assignments. Details will be on Canvas as we move through the semester.

### *Participation*

There is no perfect (or even good) way to quantify participation, and I don't like doing it for myself or for you, the students. Instead, I aim to provide a wide variety of participation methods, and trust that you will fall into a rhythm that works best for you. About once a month, there will be a short participation survey for you to reflect on your current status. I have tried to think of ways for all students to participate. Some of these are listed below:

- Speaking up in class
- Answering questions on PollEverywhere
- Sending me emails with questions or comments
- Coming to my office hours or scheduling individual meetings

### *Letter grades*

Letter grades are assigned based off the following scale. Numerical grades are **not** rounded.

$$\begin{aligned}100 \geq A+ &\geq 98 \\98 > A &\geq 93\end{aligned}$$

$$\begin{aligned}80 > C+ &\geq 77 \\77 > C &\geq 73\end{aligned}$$

93 > A- $\geq$ 90	73 > C- $\geq$ 70
90 > B+ $\geq$ 87	70 > D+ $\geq$ 67
87 > B $\geq$ 83	67 > D $\geq$ 63
83 > B- $\geq$ 80	63 > D- $\geq$ 60

If you are taking this class pass/fail, you must receive at least a C- (70%) to pass.

If you believe there has been an error in grading, I am happy to discuss it with you. However, you must bring it up to me within one week of the graded assignment being returned to you. After this, the grade is considered final.
